SUMMARY

As an Associate Software Engineer, I specialize in crafting dynamic web applications using HTML, CSS, JavaScript, and Vue.js, with a strong focus on optimizing backend processes through PHP and MySQL. My hands-on experience includes replicating e-commerce platforms and developing custom solutions, showcasing my ability to blend creativity with technical expertise. I excel in collaborative environments and quickly adapt to new technologies, consistently delivering high-quality results and enhanced user experiences.

EXPERIENCE

Associate Software Engineer Present
Programmers Force Johar Town, Lahore

Company Description

- As an Associate Software Engineer at Programmers Force, I drive the development of cutting-edge web applications, leveraging HTML, CSS, JavaScript, Vue.js, Vuex, and Vuetify to create dynamic and responsive user interfaces.
- My role involves optimizing backend processes with PHP and MySQL, ensuring seamless data integration and robust functionality.
- Collaborating closely with cross-functional teams, I participate in code reviews and contribute to continuous improvement initiatives.
- My expertise in debugging and troubleshooting has significantly enhanced website performance, delivering a superior user experience.

VOLUNTEER PROJECTS

Daraz Ecommerce Website Clone

I meticulously replicated the Daraz e-commerce platform, using HTML, CSS, JavaScript and PHP to ensure a user experience similar to the original. This project not only strengthened my technical skills but also deepened my understanding of ecommerce principles and user interface design, setting a benchmark for my skills.

Ecommerce Website using WordPress

As a testament to my adaptability and creativity, I built a comprehensive e-commerce website using WordPress and the WooCommerce plugin. I demonstrated expertise in WordPress development, front-end design, and e-commerce customization, creating dynamic pages, intuitive navigation, and an engaging shopping experience.

Retail Store Management System using Java

I collaborated on a Java-based retail store management system. By applying Java's object-oriented principles, I streamlined inventory management, sales tracking, and customer interactions, gaining invaluable insight into software engineering practices and real-world application scenarios.

EDUCATION

Bachelors In Computer Sciences (BSCS)

Superior University, Lahore
09/2021 - Present

STRENGTHS

- Team Collaborator**
Enhanced through group projects and teamwork exercises, leading to seamless collaboration and successful project outcomes.
- Adaptive Learner**
Demonstrated by mastering new technologies independently, resulting in quick adaptation and increased productivity.
